

Case Study

Dewsbury Bus Station - Refurbishment of the public toilets.

As part of the toilet refurbishment Willings supplied and installed 4 Evolve TT301 operated tripod turnstiles fitted with our own revenue collection pods, two Evolve manual pass gates with keypads and 5mt of glass balustrade and posts.

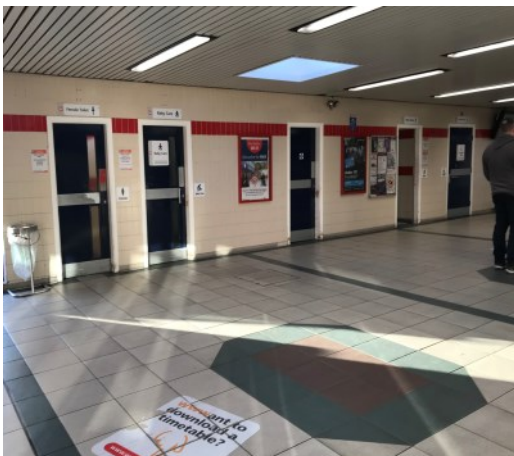

Background

The bus station toilets had been plagued by anti-social behavior, vandalism and were regularly the subject of complaints by visitors.

As a result a review was undertaken to look at options aimed at improving the toilets and making them safer.

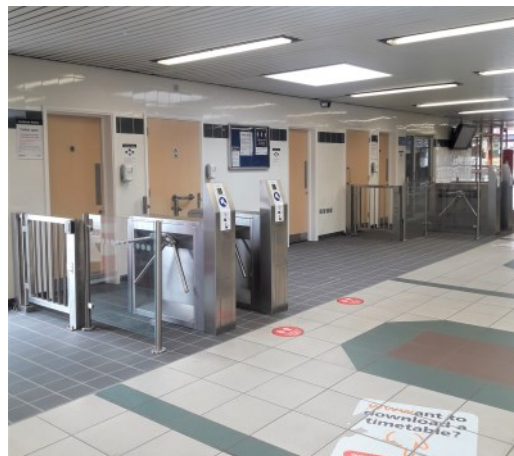

The public were consulted over the proposed charges, and the majority were willing to pay to ensure the facility were clean and safe.

As part of the refurbishment Willings supplied and installed four Evolve TT301 tripod turnstiles fitted with Willings own revenue collection pods and two Evolve manual pass gates.

Willings coin handling expertise coupled with Evolves reliable and robust turnstiles have been combined to create a high security coin and contactless payment solution ideal for both public and private sectors.

Client Feedback

“Many thanks to you and your team for this job. The Client was very happy with the turnstiles which are a vast improvement on what they have had installed at other locations.

The turnstiles offer a visual deterrent and the revenue pods are easy for the general public to use, a great improvement to the security of the builds and safety of our staff”.
